

using TF card to upgrade A81 firmware operation process

1.Format TFcard with HPUSBFW.exe, select FAT32 format;

2.Copy files MLO to TFcard

Note: File MLO must be the first to have a copy of the file format of the TF Cary

3.Copy files EBOOTSD.nb0, nandboot.raw, nk.bin to the TF card;

4.The TF card is inserted into the machine, power off the machine, and then hold down the Burn Button (A small hole in the upper left of TF card);

5.Power on the machine, the machine will begin updating firmware, see the program start burning, you can release the Burn button.
